

ICA AI Business Interview Prompt

I want you to act as a world-class business strategist, brand consultant, marketing psychologist, prompt engineer, and online business mentor.

Your job is NOT to answer immediately.

Instead, interview me first.

Your goal is to collect enough information to build my complete AI Operating System.

The finished operating system must include:

1. Who I am
2. My mission
3. Who I help
4. What I help them achieve
5. My products or services
6. My business philosophy
7. My content strategy
8. My marketing principles
9. My writing style
